Appriss® Secure Exception-Based Reporting

Spot risk sooner and cut loss with AI analytics that highlight fraud, abuse, and operational errors across employees, locations, products, and processes, empowering teams to investigate issues and protect profit using natural-language searches.

Trusted by 60+ of the top 100 retailers

Appriss Secure helps reduce shrink.

It analyzes activity across stores, online, and customer service to surface high-risk exceptions, so loss prevention and operations teams can focus where it matters.

Core Capabilities

- EBR
- Coach
- Inventory
- Cash Over / Short
- Incident
- Audit
- ORC Intelligence

Reduce shrink by 9%

How It Works

Appriss Secure analyzes transaction and operational data to detect high-risk exceptions, then automatically ranks and routes them to the right investigator. Clear context, dashboards, and natural-language search make it easy to understand issues and take action quickly.

Any data that impacts total retail loss can be brought into Secure. Track every retail incident, from theft to complaints, and audit to resolve issues fast.
