

Secure Cash Over/Short

Retailers grapple with the challenges posed by cash drawer overages and shortages, which can result in financial losses, operational inefficiencies, and risks to the business. Manual tracking and reconciling of cash drawers lead to inaccuracies, time-consuming processes, and limited visibility into cash management activities.

This lack of visibility hampers proactive action, making it difficult to identify patterns, address staff accountability, and detect potential fraud or theft. Compliance and audit challenges further exacerbate the problem. With Secure Cash Over/Short by Apriss Retail, retailers can overcome these obstacles and unlock efficient, accurate, and secure cash management processes.

KEY FEATURES

AUTOMATED CASH RECONCILIATION

Secure Cash Over/Short utilizes advanced algorithms to automate the cash reconciliation process. By leveraging the power of technology, retailers can eliminate the need for manual tracking and quickly identify discrepancies that require attention. This streamlined approach saves time, reduces errors, and ensures accurate cash handling.

PROACTIVE CASHIER MONITORING

Shine a light on high-risk cashiers before their actions become headline worthy. Secure Cash Over/Short enables retailers to easily identify register discrepancies and monitor cashier activity. By establishing lane accountability, retailers can enhance efficiency, improve customer service, and provide staff with additional time for more meaningful tasks. Our solution provides visibility and analysis, enabling proactive measures to prevent internal cash loss. Implemented, Loss Prevention can focus on the larger cases that truly indicate fraud.

COMPREHENSIVE DATA ANALYSIS

Consolidate your transaction and over/short data across all registers and produce an easy-to-view detailed analysis. With a simple toggle between views, retailers can examine metrics by register or cashier, drilling down for more specific details with a click. This robust analysis helps identify trends and discrepancies worth investigating. By utilizing the power of data, retailers can make informed decisions and take proactive actions to address cash discrepancies effectively.

INTEGRATION WITH SECURE SEARCH

Secure Cash Over/Short seamlessly integrates with Secure Search, another powerful tool within the Apriss Retail platform. This integration enables retailers to investigate further and determine if a discrepancy is fraud or a simple mistake. By leveraging Secure Search's advanced capabilities, retailers can uncover additional insights, identify potential fraud patterns, and take appropriate action to safeguard their business.

TIME EFFICIENCY AND LOSS PREVENTION

Eliminate the need for manual tracking of cash discrepancies and save valuable time. Secure Cash Over/Short presents data in a logical and intuitive manner, allowing multiple views to isolate and indicate patterns, commonalities, registers, or cashiers associated with losses. By having ready reporting on discrepancies, training issues or mistakes by cashiers can be quickly addressed, contributing to loss prevention efforts and enhancing operational efficiency.

SEAMLESS INTEGRATION WITH SECURE EBR

Secure Cash Over/Short is seamlessly integrated into Secure EBR, providing a comprehensive and cohesive solution for retailers. The data from Cash Over/Short can be utilized in Secure's dashboards, searches, and work item exceptions. With our immense retail experience and knowledge of loss prevention, the integrated data charts provide information from different perspectives, offering flexibility with a toggle of the summary level data and the ability to drill down to detailed insights. Actionable decisions can be made based on a comprehensive understanding of the cash management landscape.

FULL VISIBILITY AND ACTIONABLE INSIGHTS

Drillable dashboards and reports in Secure Cash Over/Short focus on the store level, maintaining a history of shortages and overages for cashiers or registers. These dashboards present trends and abnormalities for further research, enabling retailers to identify potential issues and take proactive measures. The solution provides a view of the top ten cashiers with the highest average in drawer openings and the most significant discrepancy values. Retailers can gain full visibility into their cash management operations and take timely and informed actions to address any discrepancies.

Cash Over/Short offers a comprehensive solution to the challenges faced by retailers in managing cash drawer overages and shortages:

- Automates cash reconciliation, eliminating manual tracking for accurate cash handling. Proactively monitors cashier activity, enhancing accountability, and preventing internal cash loss.
- Provides comprehensive data analysis capabilities to identify trends and investigate discrepancies.
- Integrates with Secure Search to strengthen fraud detection efforts.
- Saves time and enhances loss prevention.
- Offers actionable insights to optimize cash management processes.
- Protects the retailer's bottom line.
- Drives operational efficiency in cash handling.

Leveraging more than 20 years of data science expertise, Appriss Retail transforms ecommerce and omnichannel consumer interactions by providing real-time, actionable recommendations that reduce fraud, drive efficiency, and maximize profitability. The company's AI-driven, SaaS platform generates analytical insights and recommendations at more than 150,000 physical and online retail locations in 45 countries across six continents.
